DETAILED ACTION

Re-Start of Time Period

1. The Non-Final Action mailed 10/20/2004 mistakenly contained only the draft version of the Action on the Merits. The present Action supercedes and replaces that action. The time period for response is re-started as of the mailing date of this present action. Examiner apologizes for any confusion.

Claim Rejections - 35 USC § 112

2. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

3. Claims 1-9 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention.

Additionally, the claims are grammatically confusing and preclude a reasonable comparison against the prior art.

Claim Rejections - 35 USC § 102

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

5. Claims 1-9 are rejected under 35 U.S.C. 102(b) as being anticipated by SCHOELER (US 5862652), which discloses a vertical bagging machine in which a film (17) is fed down a former and pulled by rollers (19). The film is sealed by longitudinal heat sealers (30) and transverse heat sealers (23) and formed into bags..

6. The following prior art made of record and not relied upon is considered pertinent to Applicant's disclosure – they both disclose vertical bagging machines:

- WYLIE, SR.
